EDUCATION

California State University, East Bay | Master of Science in Business Analytics, expected Dec 2026
STEM-designated program with coursework in machine learning, deep learning, data mining, text mining, SQL/Python analytics, and data handling

SKILLS

Product & AI:
Product discovery, PRDs, customer problem framing, AI-assisted prototyping, LLM workflows, prompt engineering, launch planning, feedback iteration
Data & Analytics:
SQL, Python, Tableau, funnel analysis, KPI dashboards, A/B testing, product usage analysis
Technical Product Tools:
FastAPI, Next.js, SQLite, Fly.io, Playwright, GitHub, Cursor, Codex, Claude Code

PROJECTS

CrediClip | AI Credibility Analysis MVP | Product Owner & Builder

- Identified a user problem around low-trust short-form video content and built an AI credibility analysis MVP for TikTok, Instagram, and YouTube Shorts.
- Designed and shipped a FastAPI-based AI workflow with OCR/ASR extraction, queue-backed processing, SQLite persistence, Playwright recovery, and optional OpenAI claim assessment.
- Turned messy video inputs into structured credibility scores, risk flags, evidence coverage, and claim-level notes to support user-facing trust decisions.

Blue Ocean Window Cleaning Agentic Estimate Tool | Freelance Client Implementation

- Scoped requirements with a service-business client, built and deployed a Next.js quoting workflow, and iterated from client feedback through production launch.
- Integrated Housecall Pro workflows and shipped the product on Fly.io, managing the build from client requirements through production deployment.

Burrito Game Analysis | Logistics Optimization

- Built a Python integer-programming model to optimize pricing, fleet deployment, routing, and demand coverage across a constrained distribution network.
- Used sensitivity analysis to show how price, ingredient cost, and fleet size affected profitability, producing scenario-based recommendations for operational decisions.

WORK EXPERIENCE

Analogic | Product Management Intern | Boston, MA | Aug 2025 – May 2026

- Translated complex semiconductor hardware products, including RF generators, gradient amplifiers, and precision motion drives, into customer-facing launch narratives for the AVA RF plasma generator GTM.
- Partnered with engineering and sales to clarify product capabilities, use cases, and buyer-facing positioning for SEMICON West 2025.
- Built technical launch assets that helped customers understand product value, constraints, and application fit.

AtlasNova AI | Product Management Intern | Berkeley, CA | Feb 2025 – Jun 2025

- Conducted market and competitive research to define positioning and GTM strategy for an AI-native marketing automation platform.
- Built customer-facing launch content and investor materials, translating AI product capabilities into clear buyer narratives for UC Berkeley SkyDeck Investor Month.

TECNO Mobile | Product Development Manager | Jun 2023 – Aug 2024

- Analyzed user and engagement data to inform product and campaign decisions, translating findings into KPI dashboards for cross-functional stakeholders.

Telenor | Digital Product Manager | Jan 2023 – Jun 2023

- Built KPI and performance dashboards to identify conversion gaps and inform product and channel decisions.

Garena Free Fire | Product Associate | Jan 2022 – Dec 2022

- Analyzed community and campaign data to support content and product strategy decisions, reaching 118M users and generating 18M engagements.

OPPO Mobile | Product Associate | Jan 2020 – Jan 2022

- Translated product launch goals into creator workflows and cross-platform campaign systems that generated 60M+ impressions and 1.5M+ engagements.
